DETAILED ACTION

Response to Arguments

1. In the Response it was argued that the reference fails to teach a direct injection of liquid water.
2. Applicant fails to positively recite the “direct injection of liquid water”; the claims recite a “hydraulic circuit for injecting a water flow”. The “for” language discloses an intended use and is not a proper substantive limitation, except to the extent that the prior art of record needs to be capable of performing in this manner.
3. The arguments drawn to the temperature of the entering gas are not present in the claim. The inventive concept of compelling evaporation instead of condensation is considered novel but is not currently claimed with sufficient clarity.

EXAMINER’S AMENDMENT

4. An examiner’s amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner’s amendment was given in a telephone interview with Charles Muserlian on 3 August 2004.

The application has been amended as follows:

In claim 1, replace line 8 with:

--least an injection point connecting a hydraulic circuit wherein a water flow is provided --

Reason for Allowance

5. The following is a statement of reasons for the indication of allowable subject matter:

6. United States Patent No. 6,022,634 to Ramunni et al. fail to teach each and every limitation of the instant invention. Specifically, Ramunni fails to contextually teach directly injecting of water into the cell, with the contemporaneous superior cooling and humidification which is disclosed as an essential element of claimed invention, as described in claim 1.

7. Further, while Ramunni et al. and United States Patent No. 5,635,039 to Cisar et al, taken together appear to teach many elements of the invention, as claimed, the references, and the prior art of record, apparently fail to provide the requisite motivation for making the instantly claimed combination. For at least the foregoing reasons, claims 1-20 are believed to recite patentable subject matter.

8. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
